

# KHA SOFTWARE

## MacRepertory and ReferenceWorks

*Visionary homeopathic software for PCs and Macs since 1986*

"Power, innovation, accuracy, flexibility and technology... David's programs help me prescribe at my best.

Creativity, art, beauty and warmth... David infused them with the heart and soul of life I want in my practice. As though they were made just for me."

**Cheryl Feng, ND**

"I simply cannot imagine teaching or practicing homeopathy without David's programs. I encourage, no, in fact, I insist that all my students buy the programs so they will own the most comprehensive collection of current information."

**Susan Sonz, CCH**  
New York School of Homeopathy

"MacRepertory is essential cutting-edge software for every serious homeopath and student.

KHA's continual pursuit of excellence is the attitude that we all need to aspire to if we are to truly make homeopathy the medicine of the 21st century."

**Melissa Burch, CCH**

"These programs are far more powerful, more three dimensional, and yet easier to use, than anything else available.

They are great teaching, and of course, studying tools. They make learning small remedies a piece of cake."

**Miranda Castro, FSHom**

"MacRepertory and ReferenceWorks are easy for non-techies like me.

Reference Works is a wonderful intuitive analysis tool that gives me great flexibility - from traditional to the 'newer' approaches. I find them great."

**Murray Feldman, RSHom**  
Vancouver Homeopathic Academy

"I absolutely love MacRepertory and ReferenceWorks. They are completely customizable and I can set them up exactly as I like.

They are beautiful and that is important as I use them all day, all year long.

I especially appreciate how easy it is to use different repertoires."

**Richard Pitcairn DVM**

"MacRepertory and ReferenceWorks are an organic, living and breathing operating system. They have consistently proven to be reliable, current, versatile and user-friendly and have been indispensable for both my practice and teaching. Thank you David you are a creative genius!"

**Nadia Bakir, ND**  
The Canadian College of Naturopathic Medicine

"MacRepertory and ReferenceWorks just keep getting more and more sophisticated - 21st century tools indeed. I find them so very valuable in effectively dealing with the complex cases we are now seeing in our practices."

**Louis Klein, FSHom**

"These programs allow us the flexibility to apply materia medica in new ways, and think beyond the confines of the historical scope of practice. The updates keep us current with provings and serve to anchor homeopathy in a healthy synthetic approach"

**Nancy Frederick, RSHom**  
Daylight Homeopathy

The World's Most Powerful, Innovative, Easy-to-Use and Elegant Programs for Homeopathy

# KHA SOFTWARE

Kent Homeopathic Associates is an innovative and personable company consisting of homeopaths wholly dedicated to the highest standards of homeopathy.

For 25 years our programs have been at the leading edge of homeopathic theory, practice and technology.

KHA's programs were the first to include:

- Rubric selection
- Remedy graphs
- Customizable analyses
- Miasms
- Rubric grouping into themes
- Mind-mapping analysis techniques
- Analysis directly from the materia medica
- Ability to discover rubrics central to any family
- Homeopathy on the internet, and
- Multiple repertories, philosophy, and new provings
- We were supporting families of remedies a full decade before other programs saw any utility in them.
- Mouse support
- A color interface
- Family analysis
- Videos
- PC and Mac versions

The visionaries, designers, managers, trainers and sales staff at KHA are committed to creating outstanding, beautiful programs which help you to prescribe at your best while supporting and improving homeopathy throughout the world. We are passionate about what we do — and so is our community; most of our sales come through word-of-mouth endorsements from an enthusiastic community of customers and the vast majority of teachers who use and love our programs.

Our programs are elegant, powerful and easy-to-use; we believe they are easily the best in the world. But don't take our word for it; we invite you to ask any of the world's greatest homeopaths - many of whom feel so passionately that they also serve on our design team.

## Our Tools

Our repertorization tool, **MacRepertory**, makes it easy to quickly locate and select rubrics, analyze a case, check the materia medica and feel confident about your prescription.

**ReferenceWorks** is a rich, revolutionary analysis system based on a huge library of more than a thousand volumes of materia medica: from old, rare journals to the latest provings and everything in between.

## Beautiful Elegance

Designed by classical homeopaths and graphic artists, our programs think and work the way you do. They feel familiar and simple, while remaining powerful, deep and flexible.

## Expressive Graphics

The programs' scores of colorful graphs and thousands of pictures help you to easily understand what you discover. There are pictures of remedies. There are straight-forward analysis graphs. There are images that simplify the miasms from half a dozen viewpoints and many graphs that clarify the mineral, bacteria, plant and animal kingdoms.

## Taking-in the View

Our programs are designed to help you see the big picture while staying true to the uniqueness of each patient. For example, combining the approaches of Kent and Boenninghausen, you can collect the remedies with general themes and then zero-in on the specifics. You can prescribe a more exact match by instantly seeing the rare remedies similar to a polycrest. With a click you can see to which families a remedy belongs. You can analyze the central problems using only the books that focus on themes such as Morrison, Boericke, Boger, etc.

*More information. More control. More freedom. More beauty.*

"For more than 20 years I've used MacRepertory and ReferenceWorks in my practice; they are comprehensive, very easy-to-use and make the prescription quick and certain. David's implementation of the family relationships is visionary!"  
**Anne Schadde**

"Reference Works represents a major milestone in my success in prescribing. I'm not a computer person yet its brilliant design gives me easy access to all of the information I need. I cannot imagine practicing and teaching without it; really, nothing else compares."  
**Nancy Herrick, PA**

"For more than 20 years I have seen the MacRepertory and ReferenceWorks grow into sophisticated tools that are indispensable for clinical prescribing. Both programs have been fundamental in the development of my miasmatic facial analysis research and clinical work."  
**Grant Bentley, ND**

"I am completely stunned by the possibilities of these programs. I can unequivocally state that no other program comes close to what you've created. Actually, they are so cool that a word has not been invented to describe them yet!"  
**Linda Johnston, MD**

"Using MacRepertory and ReferenceWorks I can easily think outside of the box and look up any remedy instantly; the new tools really help with this. As a teacher they've been amazing teaching tools. Thank you David for your way of thinking!"  
**Avghi Constantinides**  
Los Angeles School of Homeopathy

"MacRepertory and ReferenceWorks are hands-down the most innovative and creative software around! It is like having Massimo, Rajan, Divya, Alize and Lou all rolled into one convenient and accessible friend whenever you need them."  
**Krista Heron, ND**

"MacRepertory's Concept searches are perfect for studying materia medica. ReferenceWorks is great for discovering families - so many beautiful graphs! It's a tremendous tool that has helped me to do research that would be impossible without it."  
**Jan Scholten, MD**

"ReferenceWorks and MacRepertory are very helpful, always there for me in my studies and practice. And in the most friendly and inspirational way, they trigger my mind to play, explore and develop! I highly recommend these programs to all of my students."  
**Rina Markovits, MD**

"I cannot praise the programs highly enough for their quality of information, ease of retrieval, innovation and beautiful design. They have greatly enhanced our ability to find similia, to research and to teach and for nearly 20 years I have been their greatest fan."  
**Misha Norland, FSHom**

but don't take our word for it, take theirs...

# MACREPERTORY

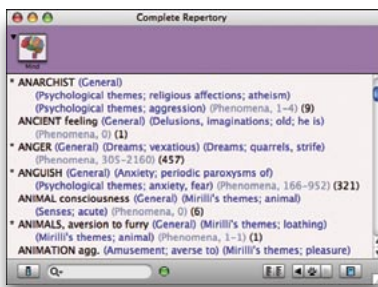

Our repertorization tool, MacRepertory, makes it easy to quickly select and analyze rubrics, get ideas for remedies, check the materia medica, do research and feel confident about your prescriptions.

## Making Friends

MacRepertory couldn't be more enjoyable to use - designed by homeopaths, it works and thinks just like you do. You have a repertory on the screen that looks like the book on your desk, only it's much more flexible and powerful.

## Finding Obscure Symptoms

With more than 35 repertories, 310,000 cross-references and a wealth of synonyms, finding the exact symptoms you want is easy. Click on a cross-reference to leap to the exact rubric. Type a word and instantly see every rubric associated with it. Select a remedy or family to see only the rubrics associated with it. Find a symptom anywhere by searching all of the repertories in one go.

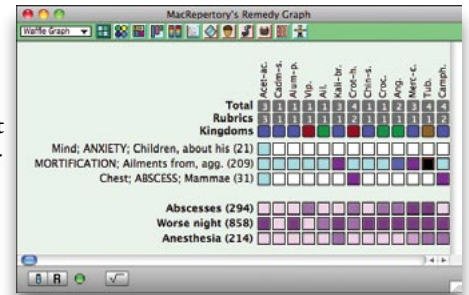

## Collecting Rubrics

With a click, collect each rubric for your analysis. You can create collections of rubrics, each representing 'the story' from a different point of view, but that's just the start. We've included a version of mind-mapping, long advocated by Louis Klein, that groups rubrics into themes. By creating themes in this way you have a clear, visual representation of what is most central to the case. This approach - unique to MacRepertory - focuses your thinking and leads to more consistent results.

## Getting Results

With over a 100 beautiful graphs, MacRepertory excels at presenting the best remedies for your case. Our Theme Analysis is tuned to emphasize the generals - collecting a pool of likely remedies - and then use the peculiars to zero-in on the precise one. You have complete control over the analysis; emphasize small remedies, nosodes, polychrests, plants, sycotic remedies, the ADHD remedies, and much more.

## Crossing Rubrics

Often preferred by veterinarians and pediatricians, crossing rubrics to find the remedies that cover the whole case is one of the simplest, yet most powerful, case analysis techniques. Just drop rubrics in our 'Elimination Tool' to see the remedies that run through the whole case.

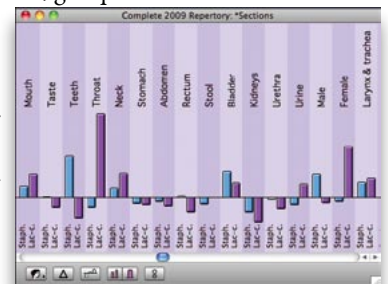

## Researching

MacRepertory turns the repertories into valuable tools for research. With a couple of clicks you can discover all the fears of *Stramonium*, the difference between *Kali phosphoricum* and *Phosphorus*, the similarities between *Calcarea carbonica* and *Asterias rubens*, or the unique delusions of the fungi. You can create profiles of words throughout the repertory - every rubric related to 'enlarged', for example, and the main remedies associated with it. But that is really just the start. Our family tools show you the rubrics common to any group of remedies. Ask Rajan Sankaran; our tools helped him to unearth the common characteristics of many of the families he describes.

## Comparing Concepts

When it is time to decide on a remedy, the Concept Graph makes it easier to differentiate between remedies, groups and families. You can compare at a glance the main expressions (repertory section, organ, sensation, modalities, etc.) of remedies - i.e. the throat for *Lac caninum* and the bladder and teeth for *Staphysagria* - making it clearer which remedies best fit the case.

## Materia Medica

Once you have narrowed your selection down to a few remedies you want to verify them in the materia medica. MacRepertory places more than seventy of the greatest focussed materia medica right at your fingertips; from Boericke, Boger and Phatak to Morrison, Scholten and Vermeulen - if you need it, it's here.

# FAMILIES

Our Professional versions of MacRepertory and ReferenceWorks include hundreds of gorgeous graphs to bring thousands of families alive. The graphs help you conceptualize the family relationships, learn homeopathic indications for the families, limit the results to just the family's members and, in the end, to prescribe more accurately.

## A World Full of Relationships

All of the sciences have faced the difficulty of discriminating between large numbers of objects; they eventually solved it by grouping similar items into categories (think of botany, zoology, psychology). Putting remedies into functional groups is not new; Hahnemann led the way by separating the 84 remedies he knew into three miasms. Depending on their degree of similarity, families can help rule out remedies that are only superficially good choices or point you towards an obscure, but more exact, cousin of a not-quite-working polychrest. Faced today with 7,000 remedies, the use of some sort of categories is very helpful, perhaps even necessary.

Luckily, brilliant homeopaths have devised new solutions. Our programs make use of thousands of homeopathic 'families' to help you to find the simillimum more easily.

### The Major Themes

- Confusion
- Intoxication
- Recognition
- Feeling Lost and Disoriented
- Vacancy
- Vacant Feeling
- Identity
- Loss of Identity
- Blandness
- Invisibility
- Value
- Materialism
- Exploitation
- Money
- Poverty
- Mental Weakness
- Delayed Answer
- Difficult Speech
- Poor Concentration
- Weak Memory
- Sensation of Sin
- Sensation of Failure
- Isolation

- Fire and Explosion
- Passivity and Motivation
- Loss of Will or Ambition
- Industriousness
- Apathy
- Meditation
- Indifference to Others
- The Past
- Longing for the Past

Based on the work of Jan Scholten

## Extending Families

With the help of Jan Scholten, Rajan Sankaran, Massimo Mangialavori, Andreas Bjørndal, Vega Rozenberg, Roger Morrison, Jan Scholten, Jorg Wichman and others, we have organized all of the remedies into 3,300 color-coded botanical, chemical, biological, miasmatic and functional families and integrated them deeply into the professional versions of MacRepertory and ReferenceWorks. Every remedy in our materia medica has been placed into its natural category.

And we have gone beyond natural taxonomy with Bjørndal and Rajan's Miasms, Five Elements, Plant Chemicals, Vega's Boxes, Murphy's Planets, Boyd's Types, Morrison's Organics, Massimo's Groups, radionic frequency – to mention only a few. And if that isn't enough for you, it is simple to make groupings of your own.

## Promoting Strong Family Values

The programs are designed so that anywhere you would normally see individual remedies, you can also display the family groups.

You can focus each window on a particular family. For example, you can limit the materia medica books in ReferenceWorks to only display their insect remedies, limit a search to syphilitic remedies that have a fear of death or discover the rubrics in MacRepertory that have a high proportion of mushrooms.

# REFERENCEWORKS

ReferenceWorks starts with a vast digital library – from old, rare books and journal articles to the newest provings, cured cases and theories – created by our community’s greatest homeopaths, past and present. And adds to it a ground-breaking search engine that enables you to quickly locate the best possible expression of your patients’ symptoms. Finally, our powerful analysis tools help you to “repertorize” your findings and explore matching remedies with our wonderful graphs.

## Finding What You Want

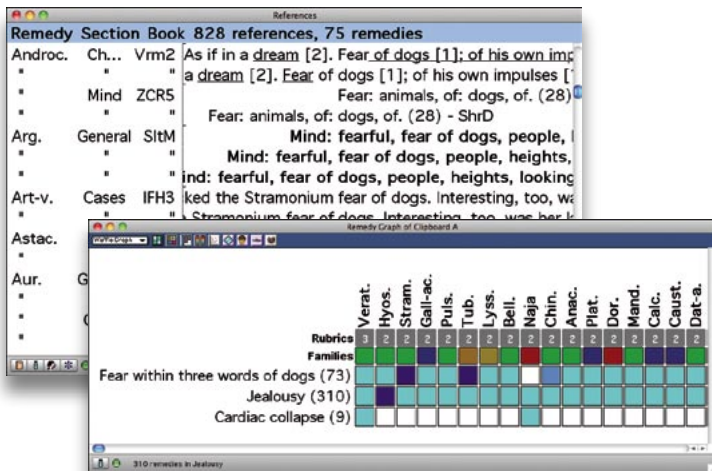

Type in a word and instantly find it no matter where it may exist – in a journal, materia medica, new proving or in your own case and seminar notes. With nearly a thousand materia medica and repertories, if it’s been recorded, ReferenceWorks will find it! And not only single words can be searched for; any combination of words, whether in the same sentence, paragraph or section, can also be found. Just type the word and hit the space-bar, and ReferenceWorks will find the exact expression that you are looking for.

Uncertain which words to use? We’ve incorporated a lexical reference system from Princeton University that gives you synonyms, related words, definitions (both current and from 1900), even words that sound similar, and translations into half a dozen languages.

## Discovering

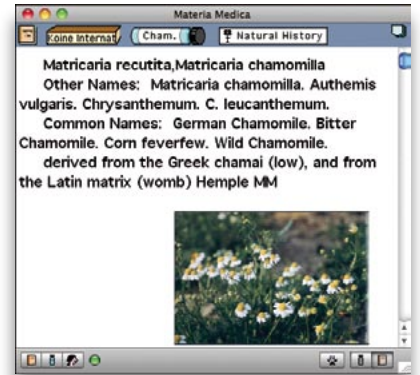

The results of your search will appear listed with each occurrence alongside the remedy in which the reference is found. Simply click on the reference to jump to the full text in the materia medica.

## Browsing

You can browse through the books just as if they were on your bookshelf, only more quickly and effortlessly.

Move in and out of the list of books with a click, or leap directly from book to book following a single remedy. For example, see only those books that contain *Calcarea lactica*. Hering would be so thrilled!

## Analyzing with the Masters

Now we come to what has made ReferenceWorks a revolution for homeopathy. As you search for symptoms you create “rubrics” that can then be analyzed just as though they came from a repertory! These rubrics are more complete than those found in any repertory because they come from a thousand books. E.g. you will find 75 remedies in ReferenceWorks for “fear of dogs” while Kent’s Repertory only shows six. Using this “rubric” from ReferenceWorks you would be ten times more likely to find the right remedy!

Once you have collected your rubrics, a click creates bar, scatter, waffle, city, family and a hundred other graphs displaying the best remedies for your case. The remedies are scored based on the importance each author gave them, how many authors suggested the remedy for the symptom and the rareness of the remedy. You can even fine-tune the results by selectively emphasizing the books you value the most. MacRepertory and ReferenceWorks share all of the same graphic abilities. (See Families description)

## Focussing on What Matters

ReferenceWorks makes it easy to focus on just the remedies that make sense. Search only in provings, cured cases or books of keynotes, limit a graph to animals or bacteria, or only show the books that discuss legumes or *Melilotus*. Choose from dozens of pre-built limits or create your own and save them for everyday use.

## Getting Out in the World

Want more? We have included 2000 remedy substance files with pictures, movies, natural history and proving information. But you are not limited to what we have collected; ReferenceWorks can search the internet directly for natural history, herbalism, side-effects, definitions and pictures.

And on top of all that, you can add your own or others’ seminar notes and cured cases. They are integrated into the programs and available to search alongside the masters.

# LIBRARIES

## MacRepertory

With more than 35 repertories MacRepertory covers every aspect of homeopathy: from the general classic repertories of Boenninghausen, Allen and Kent to the focused classics of Knerr, Jahr and Boericke. From the essential repertories of Boericke, Boger and Mangialavori to the thematic repertory of Mirilli and the drug side-effects from Marsh.

Of course we have the world's most comprehensive repertory, Zandvoort's Complete, in its different forms.

Eizayaga's Repertory lists the rubrics found in a wide variety of diseases, our Family Repertory makes rubrics of 3,000 families and the remedies found in them, and the Relationships Repertory creates rubrics of remedies that complement, follow well, etc.

There's the latest cutting edge thematic repertory from Scholten, Murphy's modern easy-to-understand version, specific repertories for thyroid problems, AIDS, diabetes and sexual dysfunction and even Bach and dream proving repertories.

When you want to find a rubric you can feel confident it will be in the library. And if you don't know where to find it you can search in all of the repertories at one time.

At the point that you're ready to confirm your prescription you want a small concise, focused materia medica at your fingertips. MacRepertory includes seventy of the best ever written: from the classics of Boericke, Boger, Choudhuri, Clarke, Dunham, Farrington, Gibson, Kent, Lippe, Phatak and Tyler to the modern masters of Morrison (both the Desktop Guide and Companion), Murphy, Scholten and Vermeulen.

## ReferenceWorks

ReferenceWorks' library is a treasure trove of valuable, and often rare, information. With extractions from ten repertories, information from 3,500 provings, scores of rare, out-of-print books, dozens of collections of cured cases, and 10,000 articles from more than a hundred journals – in all, over 70,000 remedy descriptions – you will be able to find any symptom no matter where it may be within over a thousand volumes of the world's greatest books on homeopathy.

There's everything from the Brazilian jungle remedies of Mure to the bowel nosodes of Paterson. From Hamilton's natural history of plants to Leeser's original work on minerals. From the childhood remedies of Frishmuth, Borland and Burnett to the end-of-life prescribing of Grimmer and Dunham.

From the original provings of *Belladonna*, *Bellis perennis* and *Lac caninum* by Hahnemann, Stephenson and Swan to exciting new provings of *Mosquito*, *Red-Tailed Hawk* and *Alligator* by Sunil Anand, Jonathan Shore and Todd Rowe.

From Massimo Mangialavori's 9,000 remedy additions from his cured cases to 8,000 additions from classical sources collected by Andre Saine.

From the monumental repertories of Boenninghausen, Kent and Knerr to the succinct remedy descriptions of Boericke, Boger and Morrison.

From the wisest of the old authors (Allen, Boenninghausen, Boericke, Boger, Borland, Clarke, Dunham, Farrington, Hahnemann, Hering, Jahr, Knerr, Lippe, Nash, Phatak, Swan, Tyler, etc.) to the most brilliant of the new (Klein, Mangialavori, Morrison, Moskowitz, Sankaran, Schadde, Scholten, Shah, Shore, Ullman, Vermeulen, Whitmont, Zandvoort, etc.).

"MacRepertory is my eternally reliable and brave companion; my daily and nightly tool. A most beautiful one that is developing and growing with me towards particular and healing prescriptions. I'm so glad and rich and grateful to have it!"  
**Peter Koenig, MD**

"These programs are a revolution and offer homeopathy tremendous potential! They have been invaluable for me in my research on plant families — not to mention their daily use in my clinic. I am very happy with them."  
**Rajan Sankaran, MD**

"MacRepertory and ReferenceWorks have greatly improved the speed and precision of my prescriptions. I love how intuitive the program is designed and that I can take my favorite books with me wherever I go."  
**Gabrielle Traub, M.Tech(Hom)**  
Homeopathic Academy of Southern California

"I cannot imagine existing as a homoeopath without ReferenceWorks. The program is truly part of all my development as a homoeopath. David has always lived up to our expectations of the newest advancing methodology."  
**Jayesh Shah, MD**

"For nearly 25 years I have enjoyed using MacRepertory and ReferenceWorks tremendously. As I tell my students, these are the simply the best, most beautiful, most visionary and easiest homeopathic software in the world and the ones you want to own."  
**Gianni Marotta, MD**

"ReferenceWorks is an amazing tool. At the Hahnemann institutuot we find it so simple and efficient that it encourages silence, amusement and creativity during the interview while enabling us to find our patient in the prover's words."  
**Alize Timmerman, ND**

"MacRepertory is a delight to use. I particularly like the colourful filters which easily identify themes and families. ReferenceWorks is truly amazing - seek and you shall find! I have found them invaluable in my practice."  
**David Mundy, FSHom**

"ReferenceWorks dishes out an incredible amount of knowledge in a very friendly way. The program has been of immense help in our work with Minerals, Imponderables and Nosodes. It should be a must have for every homoeopath."  
**Bhawisha Joshi, MD**

"As a Hahnemannian practitioner, I have used MacRep and ReferenceWorks very effectively in practice and in teaching for over 20 years. ReferenceWorks includes many old journals that I frequently refer to in searching for cured cases and in preparing lectures. It is an exceptional tool!"  
**Andre Saine, ND**

# CLASSIC vs PRO

Whether you are a seasoned practitioner or just beginning your studies, we've got a set of programs that are just right for you. All of our programs have the same easy-to-learn-and-use interface, gorgeous graphics and state-of-the-art libraries. All versions run seamlessly on both Windows and Macintosh.

Our Classic versions offer all of the core features of our programs: lightning fast searches, powerful analyses, access to our full libraries of books and a beautiful interface. They are designed for those who want powerful software but don't need the information about families of remedies.

The Professional versions include our full range of tools to help you become skillful using families (graphs, limits, analysis and information). If you have any interest in improving your analysis with family groupings or miasms we strongly encourage you to use the Professional programs.

They also enable you to customize all of the strategies, graphs, limits, groupings, backgrounds and interface, etc.

"This version was very easy to install, and now I am exploring all of the new features for my next project, a volume on plant remedies.  
ReferenceWorks is incredible and, as far as I am concerned, you should rename it *ReallyWonderful!*"  
**Frans Vermeulen**

"ReferenceWorks is a truly incredible achievement.  
It is a mature program which combines state-of-the-art computer programming with a deep understanding of the needs of homeopaths and inner workings of homeopathy."  
**Roger Morrison, MD**

"Whether the case needs an overview of a family group, an exact sentence in the prover's words or a peculiar central rubric the best place to find it is MacRepertory and ReferenceWorks.  
As we evolve David and his incredible work always keep pace."  
**Divya Chhabra, MD**

"I have used other programs but my results were not nearly as impressive.  
Now I strongly encourage all of my students to buy MacRepertory and ReferenceWorks.  
They are clearly the best homeopathic software available."  
**Massimo Mangialavori, MD**

"I am in love with MacRepertory and ReferenceWorks!  
I can't imagine practicing homeopathy without these elegant and effective programs at my fingertips, whether in the classroom, clinic or on the road. I show them off at every possible opportunity!"  
**Heidi Schor, CCH**  
Bastyr University

"I love the new MacRepertory!!  
It is beautiful.  
I am not well enough versed in it yet - but I can't stop playing with it.  
Thank you, thank you, thank you for all you are David."  
**Laurie Dack**  
Vancouver Homeopathic Academy

"David's own creative brilliance as well as his ability to transform the work of leading homeopaths into these intuitive, versatile and fun programs has been and continues to be the most profound and far-reaching gift to our evolving world of homeopathy."  
**Betty Wood, MD**  
New England Homeopathic Academy

"Years ago as a student I purchased the programs because I saw that many international homeopaths were using them. I use them in my clinical practice and when teaching. These are elegant and intuitive programs and a pleasure to use - a must for any homeopath."  
**Mirsada Vins, H.D.**  
Ontario College of Hom. Medicine

"The vision and depth of these programs is truly astounding.  
They have become essential in my practice, teaching and research.  
By combining creativity, imagination and powerful research tools, they help me to bring my work alive."  
**Todd Rowe, MD**  
American College of Homeopathy
